

# MEMORY LOSS WOES FOR SHREYAS

**A**ctor Shreyas Talpade recently admitted to suffering from a rare memory disorder due to which he can't recall people's faces instantly. The 35-year-old actor confessed his memory woes in an upcoming episode of UTV Stars' Superstar Santa. He said he can't remember faces, and his wife too became a victim of his disorder once. Shreyas said when he met his wife for the first time, he instantly asked her out on a date. But trouble ensued when he kept waiting for her at the movie hall, without realising she was around. He couldn't recognise her.
